

Combined ablation matrix: per-plane runtime health

19 configurations x 6 health planes. Cell = plane health in [0,1]; row mean = runtime integrity score (RIS). Detection is normalised by the baseline rate (0.481).

	Risk detection	Revocation	Evidence	Ledger	Hash-chain	Replay	RIS	
baseline (full L-DREA)	1.00	1.00	1.00	1.00	1.00	1.00	1.000	
-PE	0.00	1.00	1.00	1.00	1.00	1.00	0.833

 - CRITICAL

"n/a" = the metric is undefined because the ablation destroyed that plane. It is scored as 0 (destroyed) when averaging into the RIS, and never imputed.
